Near center bridge (18th Street)  
200 feet north of Electrical Group  
Island bus stops at door

UNLESS FLOUNDER  
SAID HE'D WAVE  
UNTIL HE WAVED

**Dial a Number...  
Hear it Spoken!**

A machine here transforms the motions of your finger into sounds - you dial a number and the machine speaks it for you.

**...IN ACCORD  
WITH THE THEME**

Chicago—and all the world—is celebrating a century unprecedented as an era of invention and development of things affecting the comfort, convenience and welfare of mankind. Officially and actually the theme of the Fair is science—particularly industrial science and research, applied science.

The telephone exhibit (partly a "work it yourself" demonstration) was planned accordingly. The Bell Telephone System display in Communications Hall near the middle of Northerly Island has proved to be one of the chief centers of interest at the Fair.

**"Oscar" is a Dummy  
but a Startling One!**

Don't miss this glass-walled room where "Oscar" performs. Through telephone receivers, you'll hear what "Oscar" hears...and he has remarkable ears.

**Souvenir Long  
Distance Call**

Visitors may call any one of 54 cities while about 18 other visitors, with head receivers, listen. A light streaks across the giant map tracing the call.

**See the "Mysteries"  
of the Dial**

Dial a number and follow the moving lights that trace the call through a maze of equipment as the dial is turned.
